Rennes and Chainette
by Ronan and Erwan Bouroullec

Though distinctly individual, Rennes and Chainette share the same basic profile and give with light and elegance. They share a handcrafted look, which is accentuated by small imperfections on their surfaces.

Rennes features wide, elongated and vertical, densely attached chrome-plated slats, creating an undulating, generous fabric. Chainette is a slatted chair and stool, made of chrome-plated slats and connected, which gives it the look of a woven fabric. The backrest, armrests and legs are all made of the same material. The backrest, armrests and legs are all made of the same material. The backrest, armrests and legs are all made of the same material.
